The Roll to Roll

information and specifications

An affordable roll textile printer that incorporates all the features you need for post production short runs and low cost print

With a print width of 1200mm, the R 2 R - F is a compact extremely versatile printer with some very smart features.

For cotton or silk prints our reactive inks require NO pre treatment and are heat cured direct on the machine. Now that's just smart!

For polyester and many other types of natural and synthetic fabrics our range of traditional pigments and sublimation inks offer a simple solution for decorating team apparel and alike.

For banners and flags are also easily printed along with soft furnishings with our specialty pigment based inks. Truly stunning vibrant prints are easily achieved with a variety of pre and post treatment solutions.

The R 2 R - F is simply a solution in one box.

Check out the DTG R 2 R - F you're sure to find the best all round solution for sampling, short run production, flagging and the like.
